A Security that trades at a relatively low price (generally such securities are trading below face value of the security) and has small market capitalization is a penny stock. These types of stocks are generally considered to be highly speculative & high risk because of their lack of liquidity, large bid-ask spreads, small capitalization and limited following and disclosure.

The client is also required to adhere to Exchange/ Members' guidelines and due diligence while trading in such stocks. Also SEBI / Exchange from time to time issues directives necessitating additional due diligence for dealing in such stock(s).

JIPL may exercise its discretion in refusing orders for stocks which have been notified as illiquid by NSE or BSE and trading below its face value ("penny stocks").

2. Exposure limits:

JIPL may, at its discretion, assign and vary limits on the orders that the client can place through the JIPL's trading system (including exposure limits, turnover limits, limits as to the number, value and/or kind of securities in respect of which orders can be placed etc.)

The client is aware and agrees that the stock broker may need to vary or reduce the limits or impose new limits urgently on the basis of the stock broker's risk perception and other factors considered relevant by the stock broker including but not limited to limits on account of exchange/SEBI directions/limits (such as broker level/market level limits in securities specific/volume specific exposures etc.), and the stock broker may be unable to inform the client of such variation, reduction or imposition in advance.

The client agrees that the stock broker shall not be responsible for such variation, reduction or imposition or client's inability to route any order through stock broker trading system on account of any such variation, reduction or imposition of limits.
